

It is absolutely essential that the airwaves which belong to the public remain accessible by diverse broadcasters. The media is NOW already owned by too few corporations who are controlling what we see, hear, understand and know about the world around us. A case in point is the Iraqi war which has been sanitized beyond any comprehension of journalistic honor. There is little media that is not controlled by the "market" with all of its politico/socio/economic biases. WE MUST CONTROL BROADCAST OWNERSHIP AND have the airwaves open to smaller and independent media.
